Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Request for Reconsideration

1. This action is in response to the request for reconsideration mailed August 11, 2003. Claims 1-2, 4-13 and 16 are pending in this case.

Claim Rejections – 35 USC § 103(a)

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-2, 4-13 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brooks et al. (U.S. 4,948,654) in view of Matsumoto et al. (U.S. 4,410,595) further in view of Enlow et al. (U.S. 6,336,988) for reasons previously stated in the Office Action submitted on February 10, 2003.

Response to Arguments

4. The arguments in regards to rejection under 35 USC 103(a) as being unpatentable over Brooks et al. (U.S. 4,948,654) in view of Matsumoto et al. (U.S. 4,410,595) further in view of Enlow et al. (U.S. 6,336,988) have been considered but is

Art Unit: 1774

unpersuasive. Applicant argues Matsumoto et al. does not teach or suggest the present invention because the mention of 'good thermal adhesion' is not identified as a particular property of the modified olefin polymer component. In response to applicant's argument, the test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references.

Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981). The purpose of the Matsumoto reference is to meet the limitation of claim 16 by showing a thermoplastic resinous laminate adhered to polyolefin plastic materials wherein the laminate comprises an acrylic-modified polyolefin resin prepared by graft-polymerizing acrylic monomers onto polypropylene resin chains (column 3, line 29 to column 4, line 12). Applicant further argues the comparative examples supplied in the last response were not addressed by the last Office Action. In Applicant's response on November 7, 2002, working and comparative examples found on page 20 to 22 of the instant application were discussed as establishing the advantages that can be achieved when practicing the claimed invention. Examiner acknowledges these working and comparative examples; however, these examples do not overcome the rejection of Brooks in view of Matsumoto further in view of Enlow. Applicant has not shown or demonstrated that the decorative sheet material of Brooks cannot exhibit the same features or advantages.

Applicant argues Enlow does not overcome the deficiencies of Brooks and Matsumoto. Because the rejections made with Brook and Matsumoto have been maintained, Enlow is also maintained for reasons of record. Examiner has acknowledged receipt of the certified copy of Applicant's priority document filed July 9, 2001.

5. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
